

Low Smoke Zero Halogen Loose Tube Cable with Thermoset Jacket

Consisting of thermoset (XLPO) jacket, AFL's LX-series of low-smoke zero-halogen (LSZH) loose tube cables are specifically designed for harsh environments.

Ideal for indoor and outdoor industrial applications, the cable design includes a dry-core water blocking system, SZ-stranded core for easy mid-span access to fibers, and a highly chemical resistant, **cross-linked UV-resistant outer jacket**.

Applications include mining, industrial, railways, subways, and much more.

Temperature Range:

Operating:	- 40°C to + 70°C
Storage:	- 40°C to + 75°C
Installation:	- 20°C to + 60°C

Application

- Subway tunnels
- Railway right-of-way
- Airport terminals
- Confined space pathways
- Steam tunnels
- Industrial
- Mining
- Shipboard

Cable Components:
